

# Rigid Industries LED Lights

**BLACK DOG CYCLE WORKS IS PLEASED TO ANNOUNCE THE AVAILABILITY OF RIGID INDUSTRIES LED LIGHTS FOR MOTORCYCLE** applications. Rigid Industries is an industry leader with the most advanced optics and circuit board technology in the business. They are extremely rugged and made in the USA as well as offer a lifetime warranty. Designed to last up to 50,000 hours with an unbreakable 100 percent optically clear lexan lens cover, these lights will be there when you need them. The “Dually” light measures only 3”x3”x3” and is perfect for dual sport or adventure touring bikes. It puts out a whopping 1300 lumens while only drawing 15 watts per light, which is less than the brake lights on most bikes. The new “D2” Dually, also a 3” x 3” model, offers even more lumens at 2600 per light while drawing a mere 28 watts. Rigid lights are available in numerous colors including white and amber and in a spot or flood pattern. For the larger twin cylinder bikes with more mounting room, like the BMW GS, a 4” light is available which fits perfectly on the crash bars. These lights are designed for the rider who wants to see better at night and have higher visibility during the day. All of Rigid’s lights are race tested and proven tough. Rigid Industries LED lights are available through Black Dog Cycle Works at [www.blackdogcw.com](http://www.blackdogcw.com) or 208-263-0438. Prices vary.

Black Dog Cycle Works designs and manufactures custom accessories for adventure touring motorcycles as well as offers quality aftermarket parts from various suppliers. They test what they sell and their passion for adventure riding and providing their clients with excellent customer service is well established in the industry. Personalized service and knowledgeable, experienced staff who are able to advise customers how to set up their bikes to meet their individual needs are what sets BDCW apart from others in the marketplace.
