

***Black Dog***  
**CYCLE WORKS** <sup>TM</sup>

MADE IN U.S.A.

Jim Hyde at Kurt Forcé's class on recovery at the **RawHyde Ranch**. Jim and many of his instructors ride with **BDCW** skid plates and footpegs on their personal bikes.

**Black Dog Cycle Works (BDCW)** focuses on only the **toughest** and **most rugged** hard parts, accessories and armor for your **BMW** and **KTM** adventure bikes. We design and manufacture our own parts—but also offer other hand-picked

### BMW and KTM Specialists

- Skid Plates (the **TOUGHEST**!)
- Platform-style footpegs
- **Enduristan** luggage systems
- **KTM** kickstand relocators and cooling systems
- Rear Racks
- LED/HID lighting solutions
- Winch kits
- And a lot more!

products that we've rigorously tested for their worthiness. The emphasis is on protecting your motorcycles for the adventures ahead. Because we share your passion, you can expect the best customer service around. Call us and see!

Motorcycle journalist Bill Dragoo torturing his bike's **BDCW** skid plate.

"I've tried and tried to tear up that skid plate. Kurt got it right for sure!"—Bill Dragoo

## What riders are saying...

"I just returned from an 8,000 mile trip to Uzbekistan, and along the way my **Black Dog Cycle Works** skid plate saved my bike. I hit something hard enough to knock me off the bike—but it did absolutely NO damage to the **skid plate**!"—Don Blackwell

"I've tested the **Black Dog** skid plate in all conditions and it has held up great without even a dent. I'm used to 300+ miles a day, and can't afford to have anything but the best. The **Black Dog** skid plate gives me that extra comfort of traveling far from home without worrying about damage to my bike."

—Casey McCoy (former KTM factory Dakar racer)

"There's no other **skid plate** on the market that is as durable and will put up with as much abuse. A must-have if you're going to do any kind of off-road adventure riding."—Jason Houle (RawHyde Instructor)

"Last month I bought a **skid plate** from you for my KTM 990 because of what **Neduro** and many others have said. This weekend I beat the sh\*t out of my bike and took second place in the team challenge. Rocks as big as small cars, and yup... the bike kept on rolling. There were 15 torn off **GS** **skid plates** on other bikes that weren't so 'lucky.'"—Paul Clanton

"The **BDCW** footpegs are wider and longer, and I'm not experiencing fatigue from standing on a 200 mile ride across the desert."

—Jeff Camacho (RawHyde Instructor)

Motorcycling industry icon, Jimmy Lewis, knows a thing or two about off-roading. Shown here with his **Black Dog Cycle Works** skid plate and footpegs equipped GSA.

"I've got quite a few parts from **Black Dog Cycle Works**. Not the least of which is their awesome **skid plate**. There's been plenty of rocks (I'm on my sixth front wheel so far!), lots of gouges on it, and not one mark on the engine case."—Rick "Doc" Lippmann

"The ultimate protection for the belly of your F800GS!"

—Bret Tkacs (Puget Sound Safety/ADVCamp Instructor)

"I made a couple of mistakes before I got into **Black Dog**, so my **skid plate** broke—now I'm on the **Black Dog** skid plate. And recently I bent my **footpegs**—now I'm on the **Black Dog** footpegs. Get it right from the start and don't mess around with the lower cost options."—Matt Manuel

# Hardcore Armor for Your Adventure Bike

**BDCW's** skid plates are unique in that they're frame-mounted, and protect a lot more of the engine area—including around the headers. And unlike other makers, they're built to take the pounding of real world off-roading. If your current **GS** **skid plate** is using the stock mounting points—then it's just costume jewelry.

**BDCW's** rear racks are battle-ready. They come pre-drilled for **RotoPax** mounts. Big user-friendly tie down points make it easy to fasten cargo. And serious off-roaders can order theirs with **WARN** (also available from **BDCW**) winch mounts.

**BDCW's** platform-style footpegs are HUGE in comparison to stock pegs. They're a lot less fatiguing when standing—and give you so much more control, it's like power steering on your bike. And, they're CNC machined from aircraft alloy for added strength and cat claw-like grip.

Easily the **toughest** and **most rugged** adventure motorcycle armor—anywhere.

In addition to manufacturing our own parts, **BDCW** proudly **distributes** uniquely useful products from these quality brands:

# ENDURISTAN

## WHEREVER YOU RIDE

Makers of superior lightweight waterproof luggage systems, including the **Sandstorm** tank bag, **Monsoon** soft saddlebags, and **Tornado** dry bags. Swiss designed to uncommonly high standards. Available **EXCLUSIVELY** from **BDCW** and its dealers.

**Rigid Industries LED lights**—Be prepared to be blown away! Simply the most impressive, powerful and durable LED lighting on the market. Lifetime warranty. Made in the U.S.A.

**Trailmaster Adventure Gear**—A990 and A1200 crashbar bags for **KTM** and **BMW** adventure bikes. Keeps the weight low and forward while providing extra carrying capacity. Also, the **HIGHLY** versatile **Changing Mat** with a million and one uses.

**TRAILMASTER**  
ADVENTURE GEAR

The best winches in the industry, and the best tool available to take your adventure bike off-road. Having realized the treacherous places some of us go to, **WARN** answered the call with new, lightweight yet powerful winches—perfectly suited to our adventurous lifestyles. **BDCW** offers custom mounts, as well as winch kits, specifically designed for the **WARN** system.

## Meet the riders behind BDCW products

Kurt and Martha Forgét (like “For-jay”) created **Black Dog Cycle Works** to feed their love of adventure riding. It’s this deep-seated passion that drives them to design and manufacture products of **unparalleled ruggedness**—including the **absolute toughest skid plate armor** available anywhere.

Kurt

With over 14 years of adventure riding and constant product development, Kurt and Martha have learned what works best, what will last, what will protect your bike—and most importantly, what will help get you home. They tirelessly punish their own machines—having

broken, bent or destroyed more than their share of parts in their ongoing quest for perfection.

While producing the industry’s **toughest skid plates** is their core competency, they also offer a full line of top quality accessories including LED/HID lighting, platform-style footpegs, performance, luggage systems, maintenance, recovery, and travel gear—all of which have been personally performance tested by Kurt and Martha.

Based in beautiful and mountainous Sandpoint, Idaho, the Forgét’s live in the ideal proving ground for the equipment they design, as well as other gear **BDCW** offers. **Black Dog Cycle Works’** products are used and abused

WORLDWIDE by many of the top names in our industry. It’s the combined feedback from them, and riders like you, that provide the basis for **BDCW’s** legendary customer service. So, if you need advice... or to discuss upgrades... please call—they’re here to help!

Martha

**A personal note from Kurt & Martha:** “Living in a small American town, we’ve come to know some of the most amazingly talented people. As a result, we made the solid business decision to build our company around these stellar craftsmen and craftswomen who care so much about their work, and continually wow our customers with superior workmanship. That’s why all of **BDCW’s** own products, and many that we distribute, are so proudly made in the U.S.A.”
